DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Landes et al. (US 6,045, 410).

Landes et al. discloses a herbicidal composition comprising a) at least one sulfonyleurea of formula I and b) at least one herbicide preferably, selected from pendimethalin, imazethapyr and bromoxynil (abstract, column 3, lines 1 thru column 4, line 4; column 4, line 60; column 5, lines 18 and 24; column 8, lines 41, 54 and 55). Tritosulfuron is taught as Formula I, compound 47 (column 7, line 20). Suitable crops the composition can be used on include cereals, such as rice (*Oryza sativa*) and corn (*Zea mays*) (column 11, lines 5-12). The compositions are used to control weeds without damaging the crop (column 10, lines 42-52).

Response to Arguments

Applicant's arguments, filed 4/17/2008, with respect to the rejection(s) of claim(s) 1-3 under U.S.C.102(b) as anticipated by Landes et al. have been fully considered and are not persuasive.

Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

Applicant argues that Landes discloses a broad range of sulfonylurea compounds with an extensive list and therefore fail to anticipate the present claims due to the amount of selection that would be required to arrive at the specific embodiment of the invention. The Examiner disagrees with this viewpoint. Bromoxynil, pendimethalin and imazethapyr are disclosed as preferred compound b). Therefore, one skilled in the art would, on reading the patent, would at once be able to envisage the present invention (See In re Schauman, 197 USPQ 5 (CCPA 1978)).

Response to Declaration

The Declaration under 37 CFR 1.132 filed 04/17/2008 is insufficient to overcome the rejection of claims 1-3 based upon U.S.C.102(b) as set forth in the last Office action because: Applicant's asserts that the Declaration provides evidence of the synergistically effect of combining compound a) with compound b). Nevertheless, the present invention rejected under U.S.C. 102(b) and cannot be overcome by a Declaration under 37 CFR 1.132.

Conclusion

No claims are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
